

Ping Identity DevOps

A Docker Quick Start Guide

Request DevOps Credentials

Using your email registered with Ping Identity, request a `devops-user` and `devops-key`.

<https://bit.ly/ping-devops-request>

Install Toolsets (docker/ping-devops)

Docker

<https://download.docker.com>

ping-devops (on Mac OSX or Linux) v0.5 or higher

```
$ brew install pingidentity/devops/ping-devops
```

ping-devops(on Linux w/o brew)

```
$ curl -L https://bit.ly/ping-devops-install | bash
```

Configure ping-devops

Using the `devops-user` and `devops-key` sent via email, configure your local installation.

```
$ ping-devops config
```

Start Docker Container w/ PingFederate (or other products)

```
$ ping-devops docker start pingfederate
```

Log into PingFederate Console

<https://localhost:9999/pingfederate/app>

User: Administrator

Password: 2FederateM0re (That's a Zero in M0re)

Ping Identity DevOps

Extra Credit

Get Info on Getting Started Docker Examples

```
$ ping-devops docker info
$ ping-devops docker info pingfederate
$ ping-devops docker info fullstack
```

Start an Example

```
$ ping-devops docker start pingfederate
```

Stop an Example

```
$ ping-devops docker stop pingfederate
```

Remove an Example

```
$ ping-devops docker rm pingfederate
```

Clean up Everything

```
$ ping-devops docker clean
```
